

Be Visible. Be Connected. Be on Pathways.

Two ways to benefit from Pathways

Pathways is a trusted clinical navigation system, bringing specialist and clinic information, referral details, clinical tools, patient resources, and community and Health Authority services together in one place.

There are two ways to benefit from Pathways:

- 1 Have your practice profiled so colleagues can find accurate, up-to-date information about your services
- 2 Obtain a Pathways login to access clinical tools and resources.

Note: These are separate opportunities, and you can have one or both.

Why create or update your Pathways profile?

- ✓ **Help colleagues find you.** Show the referrals you accept, areas of special interest, languages, telehealth options, referral requirements and other practice details.
- ✓ **Support better referral decisions.** Clear, current information helps referring clinicians identify the most appropriate specialist or clinic and understand what is needed before referring.
- ✓ **Keep your information in one trusted place.** A Pathways listing gives clinicians a consistent source for the information they need at the point of care.
- ✓ **Make changes easier to communicate.** Keep colleagues informed when referral criteria or practice information changes.
- ✓ **Support smoother office workflow.** Better information up front can reduce avoidable calls, questions and incomplete or inappropriate referrals.
- ✓ **Be part of a province-wide clinical directory.** Over 95% of community-based specialist clinics are listed on Pathways, and nearly all BC family practice offices use the system.

Why get a Pathways login?

Each clinician and authorized clinic staff member can request their own individual login to access Pathways, including:

SPECIALISTS & CLINICS Referral requirements, wait times, areas of special interest and practice details.	CLINICAL TOOLS Guidelines, decision aids & calculators, forms and Care Pathways available at point of care.	PATIENT RESOURCES Trusted information that can be shared or emailed directly to patients.
COMMUNITY SERVICES Searchable community and Health Authority services, with filters to narrow to relevant supports.	REFERRAL SUPPORT Information that supports informed referral decisions and reduces time spent searching.	CLINICIAN FEATURES Streamline your workflow with features like curated collections of patient info that can be emailed in bundles.

Pathways by the numbers:

10.2M	Close to 100%	95%+	7,200
page views annually	of BC Family Practice offices use Pathways	of community-based specialist clinics listed	clinical tools and emailable patient info
